[Product Details](#)

Main Ingredients in Toothpaste

Green Tea Extract

Catechin, a major ingredient of green tea, enhances immune power, as polyphenol ingredient has anti-oxidation and anti-biotic effect, and is effective for removal of bad breath by deodorizing action.

Propolis extract

This is dark brown colored and sticky resin liquid collected from entrance of bee hive and a natural antibiotic substance with anti-bacterial and anti-inflammation effect to inhibit propagation of various bacterial and virus.

Oral Hygiene (Toothpaste)

Most important ingredient that toothpaste can contain is **fluoride**. Using a fluoridated toothpaste is one of the most significant things you can do for keeping your teeth and mouth healthy.

A topical fluoride helps hardens your teeth and promotes an overall healthy mouth.

Oral Hygiene (Toothbrush)

It is important to **brush your teeth** to prevent gum disease. Refusal to **brush one's teeth** for several days can lead to the onset of gum disease.

Brushing ensures the removal of plaque, which is the primary cause for **tooth** decay and gum disease; it also arrests the build-up of any plaque formation.
